Personal Projects

Hello Friend | June 2018 - Present

This is an Android app that is similar to one of Android's hidden games.

- I am working with the Android Studios development tool
- I am using Java to create methods and effects
- I am using Android Studios phone emulator for testing my build.

Voter Info SMS Smart Bot | April 2018 - Present

This is a non-for-profit project out of Code for KC that involves a SMS chat bot that will provide end users important voting information.

- I am using Twilio to programmatically make and send text messages.
- I used the Twilio REST API to send out going messages from my Twilio number using Python
- I used Postman to help save and manage multiple APIs

SILENT NIGHT | 2016

A holiday themed adventure game for Windows PC. While delivering presents, Santa Claus gets trapped in a haunted house and must find his way out.

- Developed the concept of the game
- Implemented puzzles and strategic game play functions
- Operated in the Adventure Game Studios game engine

Work Experience

TECHNICAL SOLOUTION ANALYST| CERNER | JANUARY 2017-PRESENT

- I troubleshoot CCL(SQL) scripts to help gather information for issue resolution
- I build and interpret commands that function in the background of all solutions in Cerner
- I assure that custom commands are built to best practice standards

WEB DESIGN AND DEVELOPMENT INTERN | HOWARD CONSULTING | JANUARY 2014-MAY 2014

- Studied HTML and Java Script through Code School
- Studied Sass and CSS
- Completed weekly evaluations on my tutorials.
